

Multifunctional HIFU Machine

Principle

It is a sectional type RF Microcrystals + multi-row fixed-point + 360 ° non dead corner+ custom point + 360 ° 3D surround technology. It combines 4D multi-row, Radar Carving, liposonic and RF microcrystals. 4D multi-row, Radar Carving is aimed at skin aging, and liposonic is aimed at the problem of body obesity, which can effectively tighten and lift the skin, dissolve fat, and shape the body. Golden radio frequency can effectively improve the skin condition and restore young and healthy skin; vaginal HIFU treats women's vaginal slack and dryness and other problems.

Applications

Body Shaping, Body Slimming, Fat Reduction, Vagina Tightening, Wrinkle Removal, Face Lifting Stretch Mark Removal, Skin Tightening, Skin Rejuvenation

Advantages

- 1.the most effective way for body shaping, slimming, fat reduction
- 2.mutlifunctional device with 6 kinds of handles
- 3.A safe non-invasive way.
- 4.No surgery, no special diets
- 5.No influence to the normal activities

(disposable insulative head)

Microneedle RF heads

(10000 shots)

Hifu cartridges for vagina

(62000 shots)

Radar carving hifu cartridges

(20000 shots)

4D Hifu cartridges

(500shots)

Lipohifu cartridges

Product name	Six in one(Radar carving+4D multi-row+vaginal tightnessidetection+liposonic+RF)
output frequency	1MHz--7MHz
Output voltage	10-200w
Input voltage	AC 110V-220V 50Hz/60Hz
Fuse	5A
Size ofAir box	41×38×52cm
Weight	15kg
